To whomsoever it may concern

This is to certify, Mr Hardik Agarwal, Mr. Arjun Sharma, Mr. Pratyush Misra and Mr. Shreyansh Singh have developed StockSaint application under my guidance during June'2021.

This web based application not only fetches historical price of equity instruments, plots these with additional moving average information but using heuristic algorithm, calculate predictive prices (Open/Close/Low/High etc). Application has been designed and developed using CSS, HTML, Python, EJS, NodeJS, Bootstrap and Java Script technologies to maintain performance benchmarks while handling bulk data and plotting graphical interfaces.

All industry quality analysis standards and norms were ensured by Unit Testing during development followed by System Integration and Load Performance testing.

All these 4th Semester Computer Science students of Jaypee Institute of Information Technology – Noida have been very disciplined, organised as a team and accountable for responsibility assign during the project. I wish them success and this project will be an initial milestone of professional career.

Thanks & Regards
